Alle angegebenen Bedarfszahlen beziehen sich auf eine Fugenbreite von 10 bis 12 mm.
All stated figures refer to a grouting width of 10-12 mm.

WINKEL CORNERS

LÄUFERWINKEL
EDGE CORNERS

Läuferwinkel werden vorwiegend als Stilmittel eingesetzt - z.B. für Stürze in Fensterlaibungen, zum Verkleiden von Sichtkanten im Sockelbereich oder als gleichschenkeliger Läuferwinkel hochkant an Gebäudeecken, um Akzente an der Fassade zu erzielen.

Die Produktion richtet sich nach der benötigten Menge für das gesamte Objekt und der jeweiligen Produktlinie.

Edge corners are used mainly as stylistic elements in window lintels and reveals or to clad visible edges in base areas. They can be used as equal-sided corners and laid on edge on building corners to create accents on the facade. Production depends on the amount required for the building and the desired product collection.
